

You learn with hands on training

Worksite training

Who is Ag Training

Established in 2005, Ag Training is a Registered Training Organisation (RTO) code: 31304.

We specialise in workplace training and skills development in areas of:

- Civil construction machinery operations
- Agricultural training
- Forklifts

Ag Training specialises in working with organisation and business to develop and deliver the best training solutions that will build capacity and improve productivity.

Ag Training uses flexible delivery mode which incorporates workplace learning and structured workshops that allow organisations to tailor delivery and content to match organisational demands and learner's needs.

YOU BE CONFIDENT IN YOUR OWN ABILITY

YOU ENJOY THE FLEXIBILITY

YOU BECOME MULTI SKILLED

YOU GET INVOLVED IN AN INNOVATIVE INDUSTRY

You will learn the process of operating tractors with or without attached equipment

Tractors can be used for a large variety of operations including tillage, sowing, towing chaser bins, post hole digging, front end loader, slashing and with forks on the front for horticulture

You will develop the skills to safely utilise the various components, such as:

Drawbar, three point hitch, the controls, check and confirm operational status

There is a large variation in types of tractors.

The underlying principles however are transferable to any tractor even if some of the controls are specific to newer model tractors.

Industries that tractors are used in:

Agriculture
Horticulture
Construction
Regional Councils
